

Maram Elsayed

Windsor, ON | 587-429-0364 | mrm.elsayed@hotmail.com | [LinkedIn](#) | [Personal Portfolio](#)

Skills

Languages: C, C++, C#, Java, JavaScript, Python, Pascal, SQL, HTML, CSS, MIPS.

Tools & Frameworks: Git, Django, Flask, REST APIs, JUnit, Java GUI, MySQL Workbench, Selenium, Hadoop MapReduce, Docker, Apache Spark, Jupyter, GNS3, JetBrains, Blazor, Google Firebase, ReactJS, NodeJS.

Education

Bachelor of Science in Software Engineering, *with Distinction* Sep 2018 - May 2023
Schulich School of Engineering, University of Calgary

Dean's List: 2021-2022, 2022-2023

Relevant Coursework: OOD, TDD, Data Structures, Operating Systems, Embedded Systems, Software Architecture, Computer Networks, Database, Software Testing, Big Data, Information Visualization, Data Science, Human-Computer Interaction, Biometrics Systems, Software Performance Evaluation.

Work Experience

Software Engineer – NR SOFT Inc. Sep 2023 – Aug 2024
Java, Java Swing, HTML, JavaScript, Eclipse, Socket, Git.

- Developed and deployed a desktop application with real-time socket communication and cloud integration.
- Integrated APIs and AJAX for seamless communication with a cloud web app.
- Led project delivery, presenting updates and demos directly to clients.

Junior Programmer – Cielo Solutions for Information Technology Aug 2017 – May 2018
Python, SAP, SQL.

- Assisted in SAP implementations by supporting configuration, testing, and troubleshooting.
- Collaborated with SAP Sub-agent in Qatar, contributing to deployments.
- Performed debugging and QA to support senior programmers.

Projects

M&M Wedding Portfolio Development – Freelance Developer Jul 2024 – Nov 2024
ReactJS, JavaScript, HTML, CSS, Google Firebase, Git.

- Built and deployed a wedding RSVP portfolio website on Firebase, integrating Firestore for secure guest data management.
- Designed an intuitive RSVP system, enabling real-world event usage.
- Maintained iterative client collaboration to deliver tailored solutions.

TELUS

Adaptive Bandwidth Throttling in Radio Access Networks – Capstone Industry-Sponsored Project Sep 2022 – May 2023
Python, GNS3, CentOS (Linux), Flask, Git.

- Created an adaptive bandwidth throttling (ABT) framework to optimize Radio Access Networks.
- Built a network simulation model using GNS3 and Virtual Ubuntu Desktops.
- Designed monitoring solutions to dynamically throttle based on service-grade policies.

HCI Public Library System – Course Project**Jan 2023 – May 2023***C#, HTML, CSS, ASP.NET, Blazor.*

- Designed and implemented the front-end of a dynamic library system.
- Applied HCI principles to improve customer usability and interaction.

Geolocation of Twitter Users Using NLP and ML – Course Project**Oct 2022 – Dec 2022***Python, Jupyter, Git.*

- Built Naïve Bayes models for geolocation prediction using user tweets.
- Achieved accuracies up to 79% through feature engineering and data preprocessing.

Note Goat – Course Project Web App**Jan 2022 – Apr 2022***Django, Python, HTML, CSS, SQL, REST-ful API, Selenium, Git, SQLite3.*

- Developed a note-taking web application using MVC architecture.
- Implemented back-end logic with Django and automated testing with Selenium.
- Managed data persistence using SQLite.

Certifications and Licenses**AWS Knowledge: Cloud Essentials****Jan 2025***Issued by: Amazon Web Services Training and Certification*

- Gained foundational knowledge of AWS Cloud concepts in Compute, Storage, Networking, Databases, Security, Architecture, Pricing, and Support.
