

Maram Elsayed

587-429-0364 | mrm.elsayed@hotmail.com | www.linkedin.com/in/maram-els | <https://maram-els.github.io/>

Skills

Languages: C, C++, C#, Java, JavaScript, Python, Pascal, SQL, HTML, CSS, MIPS.

Tools & Frameworks: Git, Django, Flask, REST APIs, JUnit, Java GUI, MySQL Workbench, Selenium, Hadoop MapReduce, Docker, Apache Spark, Jupyter, GNS3, JetBrains, Blazor, Google Firebase, ReactJS, NodeJS.

Education

Bachelor of Science in Software Engineering, with Distinction Sep 2018 - May 2023
Schulich School of Engineering, University of Calgary

Dean's List 2021-2022, 2022-2023

Relevant Coursework: OOD, TDD, Data Structures, Operating Systems, Embedded Systems, Software Architecture, Computer Networks, Database, Software Testing, Big Data, Information Visualization, Data Science, Human-Computer Interaction, Biometrics Systems, Software Performance Evaluation.

Work Experience

Software Engineer – NR SOFT Inc. Feb 2024 – Aug 2024

Java, Java Swing, HTML, JavaScript, Eclipse, Socket, Git.

- Developed and deployed a desktop application using Java Swing, with real-time communication via socket programming and cloud integration.
- Implemented seamless communication between the cloud web app and desktop application using APIs and Ajax calls with 'XMLHttpRequest' objects.
- Independently managed the project from inception to completion, presenting the solution to clients and providing regular progress updates to the supervisor.

Projects

M&M Wedding Portfolio Development – Freelance Developer Aug 2024 – Oct 2024

ReactJS, JavaScript, HTML, CSS, Google Firebase, Git.

- Developed the M&M Wedding Portfolio website using ReactJS, JavaScript, HTML, and CSS, featuring an RSVP system for guests.
- Deployed the site via Google Firebase and utilized Firestore to securely store and manage guest data and RSVP responses.
- Collaborated closely with clients throughout the project, ensuring their vision was realized from initial concept to final delivery, with regular feedback and updates.

TELUS Adaptive Bandwidth Throttling in Radio Access Networks – Capstone Industry-Sponsored Project Sep 2022 – May 2023

Python, GNS3, CentOS (Linux), Flask, Git.

- Developed an adaptive bandwidth throttling (ABT) framework in a team of 6.
- Created a Network Simulation Model of the ABT framework using GNS3 and Virtual Ubuntu Desktops.
- Designed a Core Network and RAN Utilization Monitoring Solution to throttle at a specified capacity based on clients' service grade.

Library System – Course Project Jan 2023 – May 2023

C#, HTML, CSS, ASP.NET, Blazor.

- Designed the User Interface (UI) of a Library System in a group of 5.
- Practiced Human-Computer Interaction methods to improve customers' experience.
- Proficiently contributed to the front-end development of a dynamic web application.

Geolocation of Twitter Users Using Natural Language Processing and Machine Learning
– Course Project **Oct 2022 – Dec 2022**

Python, Jupyter, Git.

- Built 3 Naïve Bayes models based on different textual features models to predict User's Geolocation based on User's 'Tweets'.
- Reported accuracies of up to 79%.
- Carried out EDA and pre-processed the data to comprehend the Dataset's trends.

Note Goat – Course Project Web App **Jan 2022 – Apr 2022**

Django, Python, HTML, CSS, SQL, REST-ful API, Selenium, Git.

- Developed a Notes Web Application with an MVC Software Architecture.
- Practiced back-end development, and Selenium Automation Testing.
- Utilised sqlite3 to store data.

Extracurricular Experience

Mentor for MINDCRAFT – Carnegie Mellon University in Qatar **Dec 2017**

- Helped develop leadership and communication skills throughout the event.
- Guided students participating from various schools.
